

FREE + OPEN SOURCE CYBERSECURITY

LeakShield Pro

Find. Understand. Fix.

An evidence-first cybersecurity assessment platform for authorized public websites, code, configuration and project folders.

THE PROJECT IN ONE SENTENCE

LeakShield Pro safely discovers public security weaknesses, shows the exact evidence, explains the risk, and guides developers toward a secure fix.

EXACT EVIDENCE

SAFE PASSIVE CHECKS

NO PAID API

WHAT IT CHECKS

01 Attack Surface

Public pages, endpoints, admin/login routes, robots.txt, sitemap.xml and JavaScript links.

02 Headers, TLS & DNS

CSP, HSTS, cookies, CORS, certificates, encryption and email-security records.

03 Subdomains & Technology

crt.sh plus DNS discovery, alive status, IP, HTTP response, TLS and technology signals.

04 Secrets & Exposed Files

Potential API keys, tokens, database URLs, private keys, Git, env and backup files.

05 Web & CVE Signals

Forms, CSRF visibility, uploads, redirects, error leakage, common ports and exact-version CVEs.

06 Learning & Fix Assistant

Business impact, risk priority, OWASP/CWE mapping and framework-specific remediation.

HOW IT WORKS

01

INPUT

Authorized URL, text or project

02

ANALYZE

Bounded public security checks

03

PROVE

Exact location and redacted evidence

04

FIX

Priority, learning and remediation

SCAN TO TRY THE LIVE PLATFORM

No Shodan. No mandatory paid AI. No exploit attacks.
